

Recent Project: Q-Park, Kent Street in York

Q- Park has recently redeveloped and refurbished a town centre car park at Kent Street in York.

One of the design criteria was to provide the public with a safe place to park 24 hours a day. Q- Park have used HTC Speed Gates for many years, and had no hesitation in specifying HTC Speed Gates Xentry® for the car park entry and exit lanes.

Not only do the HTC Speed Gates provide fast and reliable control of all vehicular traffic, but they also provide full control of pedestrian movements. To compliment the Speed Gates Xentry®, HTC also installed an automatic pedestrian gate for foot traffic. The Speed Gates Xentry® integrate with a pay-on-foot system from WPS. The WPS POF paper ticket also doubling up as the pedestrian access card for the automatic pedestrian gate. The HTC Speed Gates and pedestrian gate are so reliable, that Q-Park are no able to operate the car park fully unmanned 24/7. The car park has achieved the coveted **Park Safe** and **Safer Parking** awards.
